Profile

Passionate about innovation and technology. With academic background, experience working in multifunctional teams and participating in all stages of the software development life cycle.

Experience

Full Stack Developer – Delicias Andy

December 2024 – March 2025

Developed a responsive website for Delicias Andy bakery using React, Next.js, Material UI, and CSS. Using NPM, Git, and GitHub for development, including documentation and deployed on Firebase.

Full Stack Developer – E3 Digital Dev

July 2024 – October 2024

Developed and tested UIs using React, Material UI, HTML, CSS, and JavaScript. Integrated with RESTful APIs, using Java with Spring Boot for the Back End core. Employed Scrum methodology in a part-time, remote capacity.

Android Developer - ScrAPPer

November 2019 – March 2020

Developed an Android application from scratch for a gas transportation company to track scraper equipment. Using Java and Android Studio, incorporating testing throughout the development process. Prototyped the UI using Justinmind.

Industrial Instrumentalist - TGN S.A.

January 2018 – Present

Currently programming PLCs, managing team collaboration with outside contractors, and maintaining relationships with clients and suppliers. Responsible for the maintenance of gas compressor plant automation systems.

Education

Professional Developer (Front End - Back End - Database - Infrastructure - QA)

October 2022 – June 2024

Digital House (co-created by Mercado Libre and Globant)

University Technician in Programming

January 2014 – March 2019

Universidad Nacional de Salta (UNSa)
